Biota-H

Trichoderma harzianum

Biota-H is a biological fungicide based on Trichoderma harzianum, a beneficial soil fungus known for its powerful antifungal and plant-growth-promoting activity. It colonizes the rhizosphere and root surface, creating a natural protective barrier against soil-borne and seed-borne fungal pathogens. Through mechanisms like competition, antibiosis, mycoparasitism, and induced systemic resistance , Biota-H suppresses harmful fungi while stimulating robust root growth, nutrient uptake, and overall plant resilience.

Product Overview

Active Ingredients

Trichoderma harzianum 1 x 10^8 CFU/g

Formulation Type

Wettable Powder (WP)

Application Guidelines

Dosage (per acre)	Dilution
1 - 2 kg	5 - 10 g/L

Target Pathogens

Trichoderma harzianum is effective against a wide range of soil-borne and seed-borne fungal pathogens, including: Fusarium spp, Rhizoctonia , Sclerotium rolfsii , Pythium spp. (causes seedling blight and damping-off) Phytophthora spp, Botrytis spp, Colletotrichum spp, Alternaria spp.

Key Benefits

- Broad-spectrum suppression of major soil & seed-borne fungi.
- Rapid rhizosphere colonization & root protection.
- Enhances root growth & nutrient uptake.
- Promotes healthier plants & higher yield potential.
- Reduces dependency on chemical fungicides.
- Safe, residue-free, and sustainable.

Use Sites

Nurseries | Gardening | Greenhouse | Turf | Agriculture

Horticulture | Forestry | Hydroponics | Chemigation | Soil Drench

Shelf Life & Storage

12 months from manufacturing date. Store in a cool, dry, well-ventilated.

Ideal Spray Interval

15 to 20 Days depending on the pest incidence.

Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 0 days (Harvest can be carried out immediately after application).

Safety & Handling

NON TOXIC

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
