

ElixoraTM

Bacillus amyloliquefaciens

ElixoraTM is a biological fungicide based on *Bacillus amyloliquefaciens*, designed for seed treatment, soil application, and foliar use to control a wide range of fungal diseases. It effectively suppresses soil- and seed-borne pathogens such as root rot, damping-off, and foliar infections. The beneficial bacteria rapidly colonize the rhizosphere and produce natural antimicrobial compounds that inhibit pathogens while enhancing plant defense, root development, and overall crop health and productivity.

Product Overview

Active Ingredients

Bacillus amyloliquefaciens - 1×10^9 CFU/g

Formulation Type

Wettable Powder (WP)

Application Guidelines

Dosage (per acre)

1 k g - 2 K g

Dilution

5 g/L

Target Pathogens

Bacillus amyloliquefaciens targets key fungal pathogens including *Fusarium*, *Rhizoctonia*, *Pythium*, *Phytophthora*, *Alternaria*, and *Botrytis*, reducing major soil-borne and foliar crop diseases effectively.

Key Benefits

- Controls broad spectrum of fungal plant pathogens
- Reduces soil-borne and foliar diseases effectively
- Promotes strong root growth and development
- Enhances plant defense and systemic resistance
- Improves overall crop health and productivity

Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

Shelf Life & Storage

12 months from manufacturing date. Store in a cool, dry, well-ventilated.

Ideal Spray Interval

7-10 days during normal pest pressure

Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 0 days No restrictions; safe for application up to harvest, suitable for organic farming.

Safety & Handling

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
