

MaxiNeemTM

Neem Cake

MaxiNeemTM is an organic fertilizer created from cold-pressed neem seed kernels through solvent extraction. It provides natural protection against insects, nematodes, mites, fungi, and bacteria. As a soil conditioner, it improves soil structure and increases nutrient uptake, making it suitable for various crops and horticultural uses.

Product Overview

Active Ingredients

Neem Cake 100%

Product Type

Cake | Pellets

Application Guidelines

Dosage per Acre

100 - 200 kg

Target Pests / Disease

Soil Pests: Root-knot nematodes, citrus nematodes, termites, grubs, cutworms, mealybugs.
