

MysticaTM

Wetting & Spreading Agent

MysticaTM is a silicon-based non-ionic surfactant formulated to act as a wetting, spreading, and penetrating agent for agricultural spray applications. It reduces surface tension, allowing spray solutions to spread uniformly over plant surfaces and penetrate effectively – enhancing the performance of pesticides, fungicides, herbicides, and foliar nutrients.

Product Overview

Active Ingredients

Silicon surfactant

Formulation Type

Soluble Liquid (SL)

Application Guidelines

Dosage (per acre)	Dilution
50 - 100 ml	0.3 - 0.5 ml/L

Product Highlights

- Ensures uniform spreading and quick absorption of the spray fluid.
- Increases product use efficiency by 30 to 40 %.
- Compatible with insecticides, fungicides, herbicides, plant nutrients & plant hormones to all crops.
- It contains safe ingredients and has no effect on natural enemies.

Key Benefits

- Reduces surface tension for better wetting and uniform coverage
- Enhances spreading and penetration of active ingredients
- Improves efficacy of foliar sprays under various conditions
- Minimizes runoff and wastage of agroinputs
- Stable under broad pH and temperature ranges
- Non-phytotoxic when used as directed

Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

Shelf Life & Storage

24 months from manufacturing date. Store in a cool, dry, well-ventilated place.

Compatibility

Compatible with most agrochemicals. Avoid mixing with strong alkalis or highly acidic solutions. Always perform a jar test before large-scale use.

Re-Entry & Pre-Harvest Intervals | Ideal Spray Interval :

Not applicable (N/A). Follow tank-mix partner pesticide label.

Safety & Handling

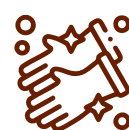

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
