

NeuvitaTM

Pseudomonas fluorescens

NeuvitaTM is a biological fungicide based on *Pseudomonas fluorescens* for seed treatment, soil, and foliar application. Controls fungal and bacterial diseases like root rot, damping-off, wilt, and leaf spot. Colonizes rhizosphere and plant surfaces, producing antimicrobial metabolites, siderophores and inducing systemic resistance. This enhances plant defense mechanisms, improves root development, and supports overall crop vigor, health, and productivity

Product Overview

Active Ingredients

Pseudomonas fluorescens 1 x 10⁹ CFU/g

Formulation Type

Wettable Powder (WP)

Application Guidelines

Dosage (per acre)	Dilution
500 - 1000 g	2 - 3 g/L

Target Pathogens

Neuvita targets a broad range of plant pathogens including *Fusarium* spp., *Rhizoctonia* spp., *Pythium* spp., *Phytophthora* spp., *Alternaria* spp., *Cercospora* spp., *Xanthomonas* spp., and *Pseudomonas* spp., effectively controlling soil-borne and foliar diseases in crops.

Key Benefits

- Controls a broad spectrum of fungal and bacterial pathogens
- Protects against soil- and seed-borne diseases effectively
- Produces antimicrobial compounds to suppress pathogens
- Enhances plant defense through induced systemic resistance
- Promotes strong root growth and nutrient uptake
- Improves overall crop health and productivity

Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

Shelf Life & Storage

12 months from manufacturing date. Store in a cool, dry, well-ventilated.

Ideal Spray Interval

7-10 days during normal pest pressure

Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 0 days (Harvest can be carried out immediately after application).

Safety & Handling

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
