

iGreenTM Si

Plant Growth Promoter

iGreenTM Si is a biofertilizer containing *Bacillus mycoides* that enhances silicon availability by converting insoluble forms into plant-available silicon. It strengthens plant structure, improves stress tolerance, and supports healthy growth. The product promotes root development, enhances crop vigor, and increases yield and quality, serving as a sustainable solution for improving plant resilience and soil health.

Product Overview

Active Ingredients

Bacillus mycoides - 1×10^9 CFU/g

Formulation Type

Wettable Powder (WP)

Application Guidelines

Dosage (per acre)

500 g - 1 Kg

Dilution

2 - 3 g/L

Mode of Action

iGreen Si works by solubilizing insoluble silicon into plant-available forms through *Bacillus mycoides*. This process enhances silicon uptake, strengthens cell walls, improves resistance to biotic and abiotic stress, stimulates microbial activity, supports root development, and promotes overall plant growth and productivity.

Key Benefits

- Enhances availability of plant-usable silicon
- Strengthens plant cell walls and structure
- Improves tolerance to drought and disease stress
- Promotes strong root growth and development
- Boosts crop vigor, yield, and quality
- Supports sustainable and eco-friendly farming

Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

Shelf Life & Storage

12 months from manufacturing date. Store in a cool, dry, well-ventilated.

Ideal Spray Interval

15 to 20 Days during growing season.

Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 0 days No restrictions; safe for application up to harvest, suitable for organic farming.

Safety & Handling

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
