

iGreenTM NPK

Plant Growth Promoter

iGreen NPK is a biofertilizer containing Azotobacter, Bacillus megaterium, and Frateuria aurantia that work synergistically to enhance nutrient availability and plant growth. It solubilizes phosphorus and potassium, mobilizes micronutrients, and supports balanced root and shoot development. This sustainable solution improves soil fertility, strengthens crop vigor, and increases overall productivity.

Product Overview

Active Ingredients

Azotobacter chroococcum - 1×10^9 CFU/g
Bacillus megaterium - 1×10^9 CFU/g
Frateuria aurantia - 1×10^9 CFU/g

Formulation Type

Wettable Powder (WP)

Application Guidelines

Dosage (per acre)

500 g - 1 Kg

Dilution

2 - 3 g/L

Mode of Action

iGreen NPK works by fixing nitrogen, solubilizing phosphorus, and mobilizing potassium through beneficial microbes, enhancing nutrient availability, improving root development, stimulating microbial activity, and promoting balanced plant growth and productivity.

Key Benefits

- Enhances availability of nitrogen, phosphorus, and potassium
- Improves nutrient uptake and use efficiency
- Promotes balanced root and shoot development
- Solubilizes phosphorus and mobilizes potassium effectively
- Boosts soil microbial activity and soil health
- Increases crop yield and overall productivity

Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

Shelf Life & Storage

12 months from manufacturing date. Store in a cool, dry, well-ventilated.

Ideal Spray Interval

10 to 15 Days during growing season.

Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 0 days No restrictions; safe for application up to harvest, suitable for organic farming.

Safety & Handling

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
