

iGreenTM K

Plant Growth Promoter

iGreen K is a biofertilizer containing *Frateriia aurantia* and *Bacillus mucilaginosus* that enhance potassium availability, improve nutrient uptake, support root and shoot growth, boost soil microbial activity, and promote crop vigor. It serves as a sustainable alternative to chemical potash fertilizers, improving soil fertility and crop productivity.

Product Overview

Active Ingredients

Frateriia aurantia - 1×10^9 CFU/g
Bacillus mucilaginosus - 1×10^9 CFU/g

Formulation Type

Wettable Powder (WP)

Application Guidelines

Dosage (per acre)

1 Kg - 2 Kg

Dilution

2 - 3 g/L

Mode of Action

K biofertilizer works by solubilizing insoluble potassium minerals in the soil through the production of organic acids, making potassium readily available for plant uptake which further enhances nutrient absorption, stimulates root growth and microbial activity,

Key Benefits

- Enhances availability of soil-bound potassium to plants
- Improves nutrient uptake and utilization efficiency
- Promotes strong root and shoot development
- Increases crop yield and quality
- Stimulates beneficial soil microbial activity
- Improves plant tolerance to stress conditions
- Supports sustainable and eco-friendly farming practices

Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

Shelf Life & Storage

12 months from manufacturing date. Store in a cool, dry, well-ventilated.

Ideal Spray Interval

10 to 15 Days during growing season.

Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 0 days No restrictions; safe for application up to harvest, suitable for organic farming.

Safety & Handling

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
