

iGreenTM N

Plant Growth Promoter

iGreen N is a biofertilizer containing specific bacteria such as Azospirillum, Azotobacter, and Rhizobium that enhance biological nitrogen fixation and improve nutrient availability. It supports balanced root and shoot development, boosts soil microbial activity, and strengthens crop vigor. As a sustainable alternative to chemical nitrogen fertilizers, it improves soil fertility and contributes to higher crop productivity and yield.

Product Overview

Active Ingredients

Azospirillum brasilense - 1×10^9 CFU/g
Azotobacter chroococcum - 1×10^9 CFU/g
Rhizobium sp. - 1×10^9 CFU/g

Formulation Type

Wettable Powder (WP)

Application Guidelines

Dosage (per acre)

1 Kg - 2 Kg

Dilution

2 - 3 g/L

Mode of Action

N biofertilizer fixes atmospheric nitrogen into plant-available forms through beneficial microbes, enhancing nutrient availability, improving root growth, stimulating soil microbial activity, and promoting overall plant growth and crop productivity.

Key Benefits

- Enhances biological nitrogen fixation naturally
- Improves nitrogen availability in the soil
- Promotes strong root and shoot growth
- Boosts soil microbial activity and fertility
- Reduces dependency on chemical fertilizers
- Improves crop yield and overall productivity

Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

Shelf Life & Storage

12 months from manufacturing date. Store in a cool, dry, well-ventilated.

Ideal Spray Interval

10 to 15 Days during growing season.

Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 0 days No restrictions; safe for application up to harvest, suitable for organic farming.

Safety & Handling

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
