

iGreenTM P

Plant Growth Promoter

iGreen P is a biofertilizer containing beneficial phosphate-solubilizing bacteria such as *Bacillus megaterium* and *Bacillus polymyxa* that enhance phosphorus availability and plant growth. It converts insoluble phosphorus into plant-available forms, improves nutrient uptake, and supports root development. This sustainable solution enhances soil fertility, strengthens plant vigor, and contributes to improved crop yield and productivity.

Product Overview

Active Ingredients

Bacillus megaterium - 1×10^9 CFU/g
Bacillus polymyxa - 1×10^9 CFU/g

Formulation Type

Wettable Powder (WP)

Application Guidelines

Dosage (per acre)

500 g - 1 Kg

Dilution

2 - 3 g/L

Mode of Action

iGreen P works by solubilizing insoluble phosphorus through beneficial microbes that produce organic acids and enzymes, converting it into plant-available forms, enhancing nutrient uptake, promoting root growth, and improving soil fertility and crop productivity.

Key Benefits

- Enhances phosphorus availability in the soil
- Improves nutrient uptake and utilization efficiency
- Promotes strong root growth and development
- Stimulates beneficial soil microbial activity
- Improves soil fertility and structure
- Increases crop yield and overall productivity

Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

Shelf Life & Storage

12 months from manufacturing date. Store in a cool, dry, well-ventilated.

Ideal Spray Interval

10 to 15 Days during growing season.

Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 0 days No restrictions; safe for application up to harvest, suitable for organic farming.

Safety & Handling

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
