

iGreenTM S

Plant Growth Promoter

iGreen S is a biofertilizer containing sulfur-oxidizing bacteria that convert elemental sulfur into plant-available sulfate forms. It enhances nutrient availability, improves soil fertility, and supports plant growth. The product promotes root development, increases crop yield, and improves quality. It serves as a sustainable alternative to chemical sulfur fertilizers, supporting overall soil health.

Product Overview

Active Ingredients

Acidithiobacillus ferrooxidans - 1×10^9 CFU/g

Formulation Type

Wettable Powder (WP)

Application Guidelines

Dosage (per acre)

500 g - 1 Kg

Dilution

2 - 3 g/L

Mode of Action

iGreen S works by oxidizing elemental sulfur into plant-available sulfate through sulfur-oxidizing bacteria. This process enhances sulfur availability, improves nutrient uptake, stimulates microbial activity, supports root development, and promotes overall plant growth, soil fertility, and crop productivity

Key Benefits

- Converts elemental sulfur into plant-available sulfate
- Enhances sulfur availability and nutrient uptake
- Promotes strong root growth and development
- Improves soil microbial activity and soil health
- Increases crop yield and quality
- Supports sustainable and eco-friendly farming

Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

Shelf Life & Storage

12 months from manufacturing date. Store in a cool, dry, well-ventilated.

Ideal Spray Interval

10 to 15 Days during growing season.

Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 0 days No restrictions; safe for application up to harvest, suitable for organic farming.

Safety & Handling

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
