

iGreenTM Zn

Plant Growth Promoter

iGreen Zn is a biofertilizer containing beneficial bacteria that enhance zinc availability by solubilizing insoluble zinc compounds in the soil. It improves nutrient uptake, supports plant growth, and corrects zinc deficiencies. The product promotes root development, enhances crop vigor, and increases yield and quality, serving as a sustainable alternative to chemical zinc fertilizers.

Product Overview

Active Ingredients

Bacillus megaterium - 1×10^9 CFU/g

Bacillus subtilis - 1×10^9 CFU/g

Formulation Type

Wettable Powder (WP)

Application Guidelines

Dosage (per acre)

500 g - 1 Kg

Dilution

2 - 3 g/L

Mode of Action

iGreen Zn works by solubilizing insoluble zinc into plant-available forms through the action of beneficial microbes. These bacteria produce organic acids and enzymes that enhance zinc availability, improve nutrient uptake, stimulate root growth, and promote overall plant health and soil fertility.

Key Benefits

- Enhances zinc availability in the soil
- Corrects zinc deficiency in crops
- Improves nutrient uptake and utilization
- Promotes strong root growth and development
- Boosts crop yield and quality
- Supports sustainable and eco-friendly farming

Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

Shelf Life & Storage

12 months from manufacturing date. Store in a cool, dry, well-ventilated.

Ideal Spray Interval

10 to 15 Days during growing season.

Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 0 days No restrictions; safe for application up to harvest, suitable for organic farming.

Safety & Handling

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
